**AES Distributed Energy and ImMODO Energy Announce Partnership to Construct 13.3  
Megawatts of Solar PV Projects in California**

BOULDER, Colo., – AES Distributed Energy, Inc. (AES DE), a subsidiary of The AES Corporation (AES), and ImMODO Energy Services Corporation (ImMODO) today announced commencement of construction of a portfolio of four solar PV projects totaling 11.3 megawatt (MW) direct current (DC) in California, and the commissioning of the 2 MW Lemoore 1 solar PV project located in the city of Lemoore, California.

“We are excited to be contributing to PG&E’s Solar Choice program and helping to provide sustainable, reliable energy solutions to California residents and businesses,” said Andrew Brentan, Business Development Manager at AES Distributed Energy. “Our partnership with ImMODO to develop and construct this portfolio of solar PV projects underscores AES’ efforts to expand its renewable energy footprint in California.”

AES DE and ImMODO will construct the four projects in the three cities of Delano (1.4 MW), Manteca (1.3 MW) and Bakersfield (7.1 MW and 1.5 MW). The projects are expected to be complete by August of 2017. AES DE is the long-term owner and operator of the portfolio while ImMODO will provide design, engineering, procurement and construction services as well as operations and maintenance services.

AES DE is a party to 20-year power purchase agreements (PPAs) with Pacific Gas and Electric Company (PG&E) to provide energy for [PG&E’s Solar Choice program](#). The program offers Northern and Central California residents and businesses the option to go solar without needing to install panels by purchasing their electricity from solar energy generated from these projects.

“We are pleased to be working together with the dedicated team at AES DE to support economic development and provide clean cheap energy in the state of California,” said Jonathan Rappe, Senior Vice President of ImMODO.

**About AES Distributed Energy, Inc. and The AES Corporation**

The AES Corporation (NYSE: AES) is a Fortune 200 global power company providing affordable, sustainable energy to 17 countries through its diverse portfolio of distribution businesses as well as thermal and renewable generation facilities. AES Distributed Energy is one of ten businesses that make up the AES U.S. Strategic Business Unit (“SBU”) providing renewable energy solutions to a diverse customer base including utilities, corporations, and governmental entities. With a workforce of 3,600 people, the U.S. SBU is committed to operational excellence and meeting the changing power needs of the United States.
