

FOR IMMEDIATE RELEASE
October 14, 2011

MAIN STREET POWER TO ANNOUNCE COMPLETION OF ITS LARGEST DISTRIBUTED SOLAR PROJECT AT SOLAR POWER INTERNATIONAL (SPI)

Dallas, Texas - Main Street Power Company, Inc. will officially announce the completion of a landmark solar project in Yuma, Arizona. Secretaries Chu (Energy), Salazar (Interior), and Duncan (Education) are among invited guests to join Main Street and partners for an early December to "Flip the Switch" on a 23-acre, five-megawatt, multi-technology solar installation at Arizona Western College (AWC). Project Fact Sheets are available via [email request](#), and interested media are encouraged to contact us for an official event invitation.

Main Street Power will exhibit in booth #1535 at Solar Power International 2011 in Dallas October 17-20, and company executives are available to meet with press to share news on recent milestones and completed, financed projects. Our new, expanded 10x20 tradeshow booth is designed to accommodate on-site meetings and interviews, and media are encouraged to arrange interviews in advance. A Main Street Power press kit (thumb drive format) is available at our booth upon request, and additional information can be found in the SPI Press Room.

Main Street will also announce the launch of a new web site with new features including a comprehensive project portfolio section, media room, and the ability for prospective customers to directly submit project details for financing consideration.

Registered media are invited to join Main Street Power for a Cocktails and Networking party Wednesday evening, October 19th to celebrate its accomplishments and partnerships with channel partners, investors, technology vendors and clients. Contact Beth Powell for an official invitation and to arrange an interview with Main Street executives during exhibit/conference hours.
